## Requirements Table — Alumni Mentorship & Mock Interview Platform

| Req ID  | Type          | Description                                                                                                                                                        | Priority | Acceptance Criteria                                                                                                                                 | Rationale                                                                |
|---------|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| FR-001  | Functional    | The system shall recommend alumni mentors to students based on domain matching (e.g., Embedded Systems, Cloud Computing) and facilitate one-click session booking. | High     | Pass: Mentorship session is added to both calendars with meeting link; Fail: Double-booking of mentor slots.                                        | Ensures relevant, efficient matching between students and mentors        |
| FR-002  | Functional    | The system shall allow alumni mentors to set and update their weekly availability slots for mentorship sessions.                                                   | High     | Pass: Updated slots are immediately reflected and bookable by students; Fail: Old/unavailable slots remain visible for booking.                     | Prevents scheduling conflicts and keeps mentor availability accurate     |
| FR-003  | Functional    | The system shall allow a student to view an alumni mentor's profile, including domain expertise, company, and past mentee ratings, before booking.                 | Medium   | Pass: Profile page loads with all required fields displayed; Fail: Any required field (domain/company/rating) missing.                              | Helps students make informed mentor choices                              |
| FR-004  | Functional    | The system shall allow alumni mentors to submit a structured post-interview scorecard (ratings + comments) for each mentee session conducted.                      | High     | Pass: Scorecard is saved and linked to the correct student and session; Fail: Scorecard not saved or linked to wrong session.                       | Provides structured, trackable feedback for student improvement          |
| FR-005  | Functional    | The system shall send automated reminder notifications to both student and mentor 24 hours and 1 hour before a scheduled session.                                  | Medium   | Pass: Both parties receive notifications at the correct times; Fail: Notification missing or delayed beyond 15 minutes.                             | Reduces no-shows and missed sessions                                     |
| NFR-001 | Nonfunctional | All user profile data and feedback scorecards shall adhere to privacy guidelines and support soft-deletion within 24 hours of request.                             | High     | Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.                                                   | Protects sensitive user data and ensures compliance                      |
| NFR-002 | Nonfunctional | The system shall support at least 500 concurrent users during peak registration periods without response time exceeding 3 seconds.                                 | Medium   | Pass: Load testing shows 95% of requests respond within 3 seconds at 500 concurrent users; Fail: Response times exceed 3 seconds or system crashes. | Ensures reliability during high-traffic periods (e.g., placement season) |
