Use-Case Flow Specification

Use Case: UC-02 — Book Mentorship Session

Primary Actor: Student Mentee

Secondary Actor: Alumni Mentor

Preconditions

- Student is logged into the platform.
- At least one alumni mentor matching the student's domain has published availability.

Postconditions

- A confirmed mentorship session exists on both the student's and mentor's calendars, with a meeting link attached.
- The mentor's booked slot is marked unavailable to prevent double-booking.

Main Success Scenario

1. Student selects "Find a Mentor" and specifies a domain (e.g., Cloud Computing).
2. System displays a list of recommended alumni mentors matching the domain.
3. Student selects a mentor from the list and views their available time slots.
4. Student selects a preferred time slot and clicks "Book Session."
5. System checks that the slot is still available.
6. System reserves the slot, creates a calendar entry for both parties, and generates a meeting link.
7. System sends a confirmation notification to both the student and mentor.
8. Use case ends successfully.

Alternate Flow

5a. Slot No Longer Available (Double-Booking Attempt)

- 5a1. System detects the selected slot was booked by another student in the interim.
- 5a2. System displays a "Slot Unavailable" message to the student.
- 5a3. System refreshes and shows the mentor's remaining available slots.
- 5a4. Student selects a different slot and resumes at step 4 of the Main Success Scenario, or cancels the booking attempt.
